

Cheshvan 5781 October 2020

BS"D

Dear Friends,

We were ecstatic this past Tuesday, seeing **over 400 people attend our first-ever live webinar**. The topic was **Medical Innovations for Couples' Health - a 2019-2020 Review**.

Immediate feedback included the following appraisals:

"Excellent! It's so amazing to hear about the latest innovations."

"Very clear and relevant."

"Yashar Koach - so much information packed into such a small window of time. May HaKadosh Baruch Hu continue to give you the means to assist so many with tahara and fertility in Eretz Yisroel and the entire world."

Leaders in our community gathered from all over the world. The webinar offered a detailed presentation about **how specific innovations turn the tide** on abnormal menstrual bleeding, infertility, recurrent miscarriage, intimacy dysfunction and pain, and menopausal disruptions.

Missed it? Watch the full webinar here.

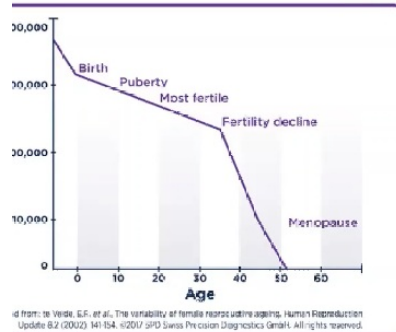

The webinar was 1.5 hours, a densely-packed survey about medical solutions most people (including many medical practitioners) are not aware about.

Starting next week, we will be teaching these webinar topics in an expanded, in-depth format over a **full semester**. This will be **our second Tahareinu Certification Course**. If you are a rabbi, rebbetzin, chassan or kallah teacher, or medical or mental health professional working with frum couple's problems with reproductive health, this course is for you. In fact, **one of the most renowned poseks in tahara, HaRav Yekutiel Farkash of Jerusalem, endorsed the Tahareinu Certification as "a must."**

Scroll down for more info on the Tahareinu Certification Course.

Looking forward to a Cheshvan full of promise.

Yours,

Rabbi Yitzchok and Mrs. Chaya Melber
Tahareinu Founders and Directors

Tahareinu Tip: Do you suffer from Lichen Sclerosus?

September 18th was the International Society for the Study of Vulvovaginal Disease's Vulvar Lichen Sclerosus Awareness Day. The what? You might ask. We will explain. Lichen Sclerosus usually affects the skin of reproductive areas, and may also affect upper body skin. Men or women can get lichen sclerosus, although menopausal women are most susceptible. According to [Mayo Clinic](#), symptoms include:

- Redness
- Itching
- Discomfort or pain
- Smooth white or blotchy wrinkled patches on your skin
- Tearing or bleeding
- Bleeding, blistering or ulcerated sores
- Painful relations
-

If you experience any of the above, contact your doctor for diagnosis as well as Tahareinu about recent medications.

CELEBRATING 5780

In case you missed it in our Tishrei newsletter, we're still relishing our impact on last year and are therefore including it in this Cheshvan newsletter as well.

Here's a glance at Tahareinu's impact during 5780.

☒ Hotline calls more than doubled to 2800/month.

☒ Couples consultations and case management also **more than doubled** to 2400/year.

☒ Officially opened in Montreal, and **continue to expand** in Lakewood, Toronto, Chicago, Montreal, Zurich, Manchester, Vienna, and Johannesburg.

☒ We continue to attend major medical conferences- all via webinar due to Corona. In August alone we attended **12 conferences** on fertility and reproductive health. This is the medical innovation knowledge we bring to you daily.

☑ Trained 180 people for Tahareinu Certification in Medical Innovations for Taharat HaMishpacha and Reproductive Health. We are very pleased to offer our second Tahareinu Certification Course.

Got a question about relieving tahara problems, infertility, reproductive health pain or other related issues?

Call the Tahareinu **Hotline**.
