

Wishing all our supporters a

חג כשר ושמח

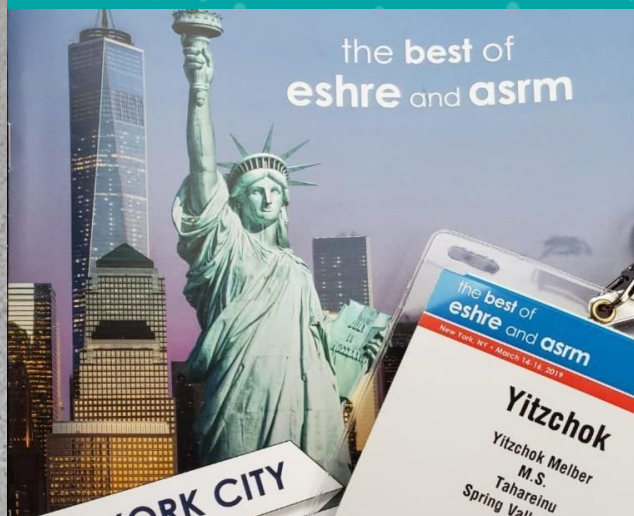

Let's raise our cups to our commitment to providing **SERVICE EXCELLENCE**.

We thank you for your support in enabling us to offer a higher level of service this winter. This past year was not an easy one for individuals and communities alike, but with *Siyata D'shmaya* and commitment from our dedicated staff, we've been able to help more women/couples/families than ever before.

The four keys to our success:

- Continued Research & Innovation
- Upgraded Technology
- Increased Manpower
- Global Education

Continued Research

Medical technology is advancing at an astonishing rate.

At Tahareinu we make it our business to attend medical conferences around the world, read the research papers and visit new units in hospitals, ensuring we are constantly up-to-date with the latest and greatest information, procedures, processes and technologies in the world of gynecology and fertility.

Medical Innovation of the Highest Caliber

Implementing the latest technology enables us to offer the most effective medical solutions, minimizing stress, cost and time. Complicated operations are constantly being

replaced with minimally invasive treatments options while new medications are opening doors to unprecedented possibilities. At Tahareinu we look to bring this innovation to you, continuously raising the bar in our service to Klal Yisroel.

Upgraded Technology

We continue to focus on and build out our computer systems to ensure maximum care and service while maintaining the highest levels of confidentiality and anonymity for all who call.

Anonymous unique identifiers enable us to log each call/caller without ever exchanging names or information that can seem compromising. Providing you with education and service while maintaining your anonymity is of our highest priority.

Global Education

Now Tahareinu has taken advantage of this past year's lockdown to make our information available to Rabbonim, Rebbetzins, Madrichei Chassanim, Madrichei Kallos, and (medical) professionals all over the world. We've developed courses, both live and recorded, to help bring the most advanced and up-to-date innovation to all those that are involved in areas of women's reproductive health, Tahara, and fertility. For information about Tahareinu courses please email office@tahareinu.com
